

# Top products for coatings

## Gloxil matt SL – Clear wood coatings

- Aqueous slurry, easy handling, no dust formation
- Good wood grain enhancement („Anfeuerung“)
- Matting effect, subsequent dosage possible
- Excellent early water and stain resistance

## Sillitin V 88 – Matting/transparency

- Natural filler with positive environmental aspects
- Easy dosing and incorporation
- Matting effect along with homogeneous surfaces
- Good transparency in UV systems/clear coatings

## Sillitin Z 89 – Standard product

- Special color neutrality
- i. a. for metal and decorative paints
- Good gloss due to fine particle size distribution
- For water-based and solvent-based systems

## Aktisil AM / Aktisil AM/89 – Long-term corrosion protection

- Available in two different color options, in addition amino-functionalized
- Improved adhesion
- Very good corrosion protection
- Excellent stone-chipping resistance

## Aktisil PF 777 / Aktisil PF 777/89 – Rheological and hydrophobic effects

- Available in two different color options, in addition alkyl-functionalized
- Rheological activity
- Improved humidity test results
- Increased resistance to chemicals

## Aktisil MAM – Improved abrasion resistance

- Property profile of Sillitin V 88
- In addition methacrylic-functionalized
- Clearly improved abrasion resistance
- i. a. for UV systems and interior dispersion paints

## Gloxil bright – Better hiding power

- Outstanding high degree of brightness and color neutrality
- Partial replacement of titanium dioxide
- For all kind of industrial and decorative paints
- For water-based and solvent-based systems
